

Name: _____ (Ollie will collect back once you complete)

Online learning reflection: Maths Methods

This is an activity to prompt us to reflect upon how we applied ourselves during online learning, and how we can put systems in place to ensure we learn in an effective way for the rest of the year.

We are now in week 7. We are more than $\frac{1}{2}$ way through the second term of your Year 12 studies. We are also approximately $\frac{1}{2}$ through the lesson weeks of year 12 (prior to your exam weeks)

What I did

During the first six weeks of Term 2, there were a few main tasks that were set. These tasks are listed below. For each of the tasks, give yourself a mark based upon the following system:

- 0 - didn't even open or look at it
- 1 - Opened it but didn't really
- 2 - Made a bit of progress
- 3 - About half done
- 4 - Got close to finishing
- 5 - I finished this task to a high standard

If for your homework you just copied out the answers from the back of the book, give yourself a 0.

Task	Your self-reflection mark (0 to 5)
FnA 8 Homework (from second last week of Term 1)	
FnA 9 Homework (from last week of Term 1)	
Watch Edrolo lesson from Trigonometry Basics to Sketching Sine and Cosine curves	
Completed Term 2, Week 2 Homework (Qs from chapters 6A to 6D)	
Watched Edrolo lessons from Solving trigonometric equations to Applications of trigonometric equations	
Completed Term 2, Week 3 Homework (Qs from chapters 6E to 6L)	
Watched Edrolo lessons from Differentiating from first principles to Chain rule)	
Completed Term 2, Week 4 Homework (Chapter 6 review)	
Completed Term 2, Week 5 Homework (Qs from chapters 9D, 9B, and 9E)	
Total mark out of 45 as a %	

Looking at this self-reflection mark, how do you feel about how you applied yourself during online learning?

Please turn over

If you are proud of your online learning efforts, what did you do that enabled you to achieve a high level of learning?

If you are not proud of your online learning efforts, what do you think is the main reason for your low amount of work?

What do you think *you* could have done, or *Ollie* could have done, to better help you stay on top of your work.

Looking forward

As we look towards the rest of the year working together, it would be great if we could develop some processes to help you stay on top of your work and achieve your year 12 goals. Please fill out the rest of this sheet to help me to best understand how I can support you to do that.

During face to face learning, if you don't complete your homework in time, which of the following would you like me to do:

- Keep me back after class to complete me work
- Give me an extension until the next lesson, and keep me back if I still haven't done it
- Give me an extension, but only if I ask you in advance (then keep me back after class if I don't meet the deadline)
- Have a discussion with me to help me work out how to manage my time better and keep me back after class too
- Have a discussion with me to help me work out how to manage my time better and don't keep me back after class
- Leave me alone, if I fail I fail, that's my choice. I a big kid, I can take care of myself.
- Other:

During online learning (if we go back to it), if you don't complete your homework in time, which of the following would you like me to do:

- Call my parents and tell them that I haven't done my work
- Give me an extension (in negotiation with me), call my parents if I still haven't done it
- Give me an extension, but only if I ask you in advance (then call my parents if I haven't met the new deadline)
- Have a discussion with me to help me work out how to manage my time better, and call my parents to let them know I'm struggling with my time management
- Have a discussion with me to help me work out how to manage my time better and don't call my parents
- Leave me alone, if I fail I fail, that's my choice. I a big kid, I can take care of myself.
- Other:

If a pattern emerges whereby, by week 3 of term 3, you still aren't handing in your homework in time, what would you like me to do?
